

AI Workflow Automation Pack

Blueprints for responsible AI-assisted workflows

Content workflow

- Collect brief → generate outline → draft → human review → fact check → edit → publish.

Support workflow

- Classify question → retrieve approved information → draft response → human escalation for exceptions.

Research workflow

- Define question → gather sources → summarize → verify key claims → produce decision brief.

Safety rule

- Do not place passwords, OTPs, payment PINs or sensitive customer credentials into AI prompts.
